

EMBROIDERY STUDIO 2025

Create Without Boundaries

*What's
New!*

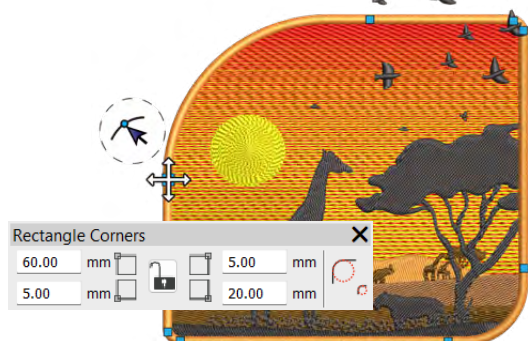

Flexible Purchase Options Now Available

Choose a plan that suits you! One-time purchase for lifetime access or a subscription to stay current and unlock exclusive features. Available for Designing and Decorating.

wilcom.com

Easily Add Smooth, Rounded Corners

Easily control the curve of each rectangle corner, adjusting one or all four corners independently. Perfect for creating badges.

Create a Smooth Base

Laydown Stitch controls fabric nap with an open-stitch background, ideal for high-nap fabrics like Terry toweling, knits, and microfiber fleece—no solvy required. Apply it to any embroidery object.

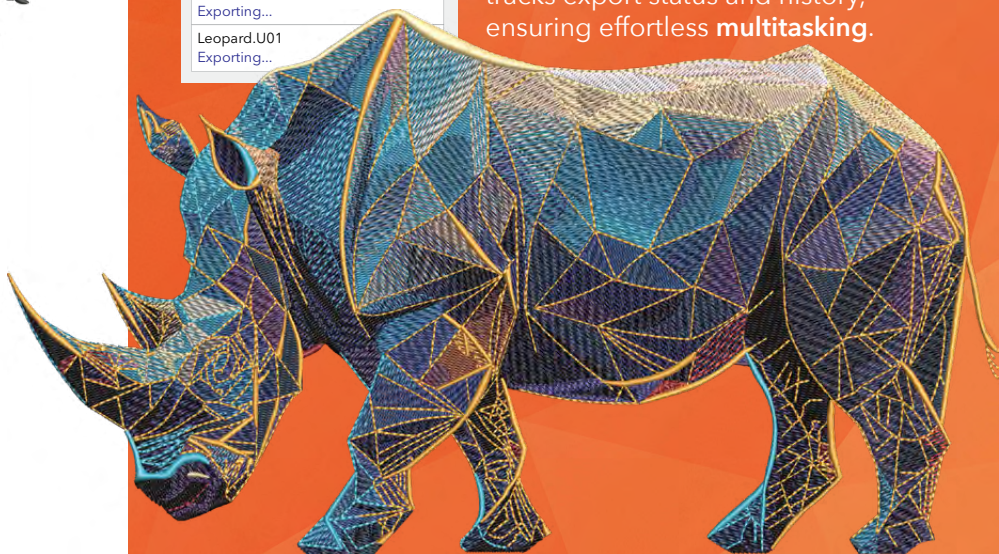

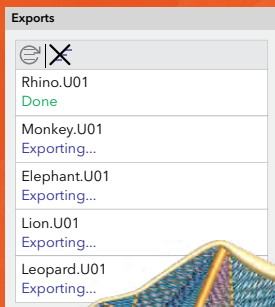

NEW
HoopMaster
Mighty Hoop
support

Export Files as You Keep Working

Export machine stitch files in the background as you continue digitizing. The new Exports Docker tracks export status and history, ensuring effortless **multitasking**.

Efficient Editing and One-Click Functions

Enhanced onscreen machine functions are designed for easy editing, combined with one-click features to boost efficiency and speed.

ENHANCED

Save Time with Auto-Digitizing!

Quickly replicate bitmap designs with automatic object sequencing and color reduction options. Auto-digitize entire designs or sections and combine with traditional digitizing for maximum efficiency.

Lettering

just got better!

Keyboard Design Collection (KDC)

Easily map alphabets and embroidery designs to keyboard characters, making them instantly accessible with lettering and monogramming tools.

Lettering Resequenced

Expert resequencing for professional-quality results. Managing overlaps, ensuring key stitches are sequenced first.

NEW

Min and Max height display

Wilcom Academy

Comprehensive, step-by-step training to support your learning journey, with exclusive content available FREE to licensed Digital Edition and 2025 customers.

Multi-Hoop

Create and export designs that split over multiple embroidery sewing fields.

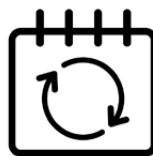

ENHANCED

Improve Production with Branching

Designed for greater efficiency with reduced travel runs, eliminating costly trims.
